

RETRUST

Identity & detection intelligence service

Protect your customers and your digital business

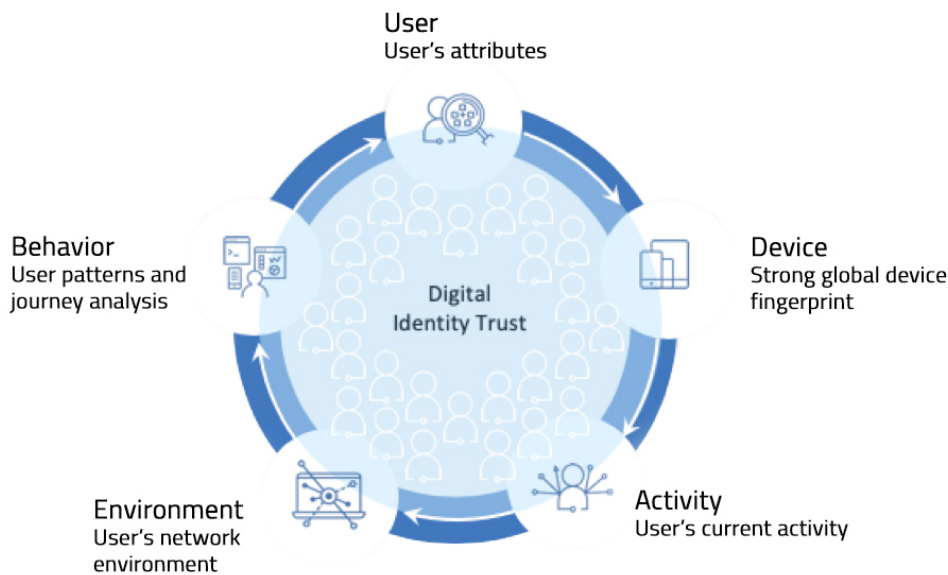

With IBM Trusteer you can build digital trust with your customers, new customers and keep fraudsters out.

Customers on digital platforms expect a seamless digital journey, whether they're making a purchase, signing up for a new account or service or simply updating their contact information. Organisations need to deliver a frictionless experience for their true customers, while keeping malicious activity out.

Using IBM Trusteer, you'll be able to establish, maintain and sustain digital trust with your customers. The agile cloud platform is built with advanced AI and machine learning capabilities, giving your company and your customers a secure digital journey.

5 in 1

The product consists of 5 detection steps that maximise your security.

To prevent fraud, IBM Trusteer relies on 43 billion sessions each month to detect and identify true customers and fraudsters. The software is able to take device, user, activity, behavioral biometrics and other patterns into account, leaving your customers protected. When Trusteer detects risk, you get to decide how you want to handle fraudsters trying to impersonate your true customers, compromise accounts or steal payment information or even personal data.

Delivered by any.cloud, powered by IBM

ReTrust is powered by IBM Trusteer and delivered by any.cloud – as the only service provider in the world, giving you full access to the only IBM Trusteer product in a highly cost-effective *as-a-service model*. That lets you focus on your business and your true customers and lets the platform detect and keep malicious fraudsters out.

Protect your customers and build digital trust with ReTrust!
